## **TheraBootie LLC Introduces Therapeutic Solutions That Cover You From Hand To Toe**

*WEST FALLS, NEW YORK-MAY 7, 2008- THERABOOTIE LLC*, a company that produces products that promote and encourage improved skin care, turns out two good solutions to promote faster healing of dry skin on the hands and feet. “We all have dry hands and feet when the cold weather moves in but for some of us it is a chronic problem” said Jean Zicarelli, inventor and owner of the company. After searching the market place for a comfortable solution to retain moisturizer on her skin she discovered there were none that truly worked. The products offered today are cotton socks and gloves which are very restricting. They only soaked up the moisturizer and were uncomfortable to wear. As an inventor and retired Registered Nurse, she decided to solve this problem for herself. She invented the TheraBootie™ and The Mit to facilitate the healing of dry, cracked skin on the hands and feet. They are to be worn with your choice of treatment whether it is lotion, essential oils or medication. Your toes and fingers are free to move about inside the mit and bootie.

“These products were designed and developed to promote healing of problem skin. They are non-restrictive and comfortable to wear, hypoallergenic, latex free and disposable. The breathable inside liner makes sure your treatment stays on the skin for as long as you want it there. TheraBooties were used in a pilot program over a six month period from October, 2007 to April, 2008. Dr. David Vona, DPM managed the program targeting diabetics and the importance of proper foot care. The TheraBootie proved to be an effective product for the treatment of dry skin, fissures, calluses and debridement of the feet. Use contact information to learn more about the findings from the pilot program.

The TheraBootie™ products will help to improve the integrity of the skin, secure the treatment of choice on the skin to promote healing and provide a comfortable solution for moisturizing and treating numerous ailments on the hands and feet.

Founded in 2005, **TheraBootie LLC** ([www.therabootie.com](http://www.therabootie.com)) The Company was formed around an invention created by Jean Zicarelli, a retired Registered Nurse. TheraBootie LLC is registered with the FDA, is a Certified Woman Owned Business in NYS and patents are pending. Interest in the product prompted an interview with Business First, Western New York’s Business Newspaper and marketing strategies have begun to various retail stores, Spa’s, Salons and Medical Supply Company’s.

TheraBootie™ and The Mit can be purchased for \$3.00 each online at [www.therabootie.com](http://www.therabootie.com), call 716-941-6276 or email; [TheraBootie@aol.com](mailto:TheraBootie@aol.com) and Bensons Surgical Supply 800-876-1113 or [www.bensonsurgical.com](http://www.bensonsurgical.com)
